College of Applied Health Sciences (AHS)

The University of Illinois at Chicago

Administrative duties include the fiscal oversight of an annual \$6M budget, covering the support of 26 full-time faculty (tenured/tenure-track/clinical), 65 adjunct faculty, and 5 staff—including supervision of all research, education, and service efforts for BHIS. Responsibilities also include advancing the educational and research rigor of the department's graduate (MS/Ph.D.), undergraduate, and certificate programs—approximately 1,000 students in total.

Reporting to the dean of Applied Health Sciences, outward-facing responsibilities include the development of long-term strategic planning, budgetary projections, and (RCM) revenue generation in the areas of enrollment growth, as well as retention and graduation management for face to face and online programs.

Collaborative efforts include both inter-college and university-wide relationship-building. AHS inter-college (research and teaching) collaboration with other department heads from Disability and Human Development (Intellectual Disabilities) Occupational Therapy, Physical Therapy, and Kinesiology and Nutrition. Extensive work in fostering interdisciplinary synergies includes partnerships in research and joint programs with other units, including the Colleges of Medicine, Nursing, Public Health, Pharmacy, Engineering (primarily Bioengineering and Computer Science), and Liberal Arts.

Indiana University—School of Informatics and Computing

Indiana University—Purdue University, Indianapolis (IUPUI)

Descriptions: Executive associate dean (EAD) and chief executive and academic officer for the School of Informatics and Computing on the Indianapolis Campus, reporting to the provost (IUPUI) and dean of SoIC (Bloomington, IN).

Administrative duties included fiscal oversight of a \$9.6M budget and programs that generated over 8,000 credit hours per year. Work included day-to-day oversight of all school-wide operations, which involved just under 1,000 undergraduate and graduate students (BS/MS/Ph.D.). The school was composed of 37 tenured/tenure-track and full-time lecturers and research associates.

EAD duties included the management of all associate and assistant deans, staff directors, and program directors in the areas of health informatics, bioinformatics, health information administration, human-computer interaction, media arts and science, and informatics (see list below). The inclusion of the Department of Library and Information Science (in the School) transpired at the conclusion of my leadership as EAD, in 2013.

EAD responsibilities also included oversight of all academic and faculty affairs, as well as SoIC's educational and research mission, strategic planning, budgetary projections, and RCM revenue generation in the areas of undergraduate and graduate enrollment, as well as student outreach, marketing, and retention. Other responsibilities included advancing diversity and inclusion, international education, hiring and retaining high-quality research faculty with strong potential to obtain funding, creation of research and teaching labs, fundraising, and building cross-campus and community partnerships.

Furthermore, EAD duties included extensive work to foster interdisciplinary research synergies between the school's programs—e.g., health informatics in collaboration with human-centered computing and media arts and science—as well as across multiple campus units. For example, campus-wide collaboration was extensive, including the development of ongoing partnerships with the Schools of Medicine, Nursing, Art and Design, Science (computer science), and Engineering. Other key responsibilities included developing health informatics research and teaching partnerships with the Regenstrief Institute and the Indiana Health Exchange.

Outward-facing management included communication and reporting to campus administration regarding the school's mission, and the annual progress and long-term planning of the school's enrollment, graduation, research, and budgetary projections. Overall responsibilities and accomplishments related to program growth and student success are outlined in the “Accomplishments” section below. Reporting lines to the EAD include:

FOUNDING DIRECTOR, Human-Computer Interaction (HCI)——2002–2014

Indiana University—School of Informatics and Computing, Indianapolis

As founding director of the human-computer interaction program, I oversaw all program and course development, faculty and student affairs, enrollment growth and retention, and the general management of all HCI programs; i.e., MS, Ph.D., UG, and graduate certificates.

The HCI program focuses on the human-centered computing, design and usability testing of interactive technology. Students learn to create prototypes, simulations, and diagnostic tools for software, mobile apps, and virtual and augmented reality. They also explore the use of 3-D printing and the design of prosthetics, as well as application of big data analytics to address new questions in the fields of health, business, education, and social media.

As founding director of the HCI, I focused primarily on curriculum development and the expansion of programmatic opportunities within and outside of the school, working primarily with the Department Computer Science and Information Technology. Additional responsibilities including hiring faculty, research, and collaboration with community partners. Key accomplishments included:

- Led the increase of the HCI Ph.D. program enrollment by 1,000%.
- Led development and inauguration of three graduate and one undergraduate program in the HCI.
 - HCI MS Program Fall 2002 (*Began*)
 - HCI Grad. Certif. Program Spring 2008 (*Began*)
 - HCI Ph.D. Track, Informatics Fall 2008 (*Began*)
 - HCI Undergrad Certif. Program Fall 2010 (*Began*)
- Led the design and development of all core MS HCI courses, including HCI 1, HCI 2, Usability and Evaluative Methods in HCI, Psychology of HCI, and Prototyping of Interactive Products. As director, I acknowledged the growing need for students to acquire a comprehensive understanding of HCI theory and practice.
- Led the search for and hiring of key research HCI faculty with Ph.D. or post-doc degrees from Penn State, Cambridge University, Cornell University, and University of Lugano, Switzerland.
- Initiated and co-led the creation of the **User Simulation and Experience Research (USER)** Lab for faculty and graduate students from HCI, MAS, and HI. USER provided a sandbox for interdisciplinary faculty-student research. It also helped to facilitate collaboration by bringing together investigators from different disciplines such as health informatics and health gaming, interaction design, new media, information visualization, medicine, and the rehabilitation sciences. Specific research areas included:
 - Games for Improving Health
 - Human-Centered Interaction Design
 - Visualization and Interactive Spaces
- Led the program in increased enrollment—by 2012, student enrollment exceeded 50 MS and 10 Ph.D. students.
- Led the creation of the first HCI graduate program curriculum document that included new specifications for the HCI MS thesis and project guidelines.
- Led the creation of the first HCI Ph.D. program and curriculum development.
- Led the design and advertising of key promotional materials for the HCI program. During the 2007–2008 school year, marketing outcomes included the single largest increase in enrollment since the program’s inception.

DIRECTOR, Media Arts and Science (MAS)——2007–2009

Indiana University, School of Informatics and Computing, Indianapolis

As director of media arts and science (MAS), I oversaw all programmatic and curricula development for both the undergraduate and graduate programs. Established quarterly meetings with the MAS advisory board to address curriculum, program support, and funding. Oversaw faculty and student affairs, enrollment growth and retention, and the general management of the program. As the director of the largest undergraduate program in the school, I worked primarily with the Schools of Science and Art and Design in expanding course offerings and developing joint programs. Key accomplishments included:

- Led the faculty to conceive of a new vision and direction for the MAS program. Based on this exploratory work (2007), groundwork was laid for new undergraduate and graduate programs.
- Led the revision of the MAS graduate program curriculum, including a new arrangement of the courses based on the new vision, increased program rigor, and the addition of a thesis rather than a capstone.
- Led the development of the MAS certificate program based on the revised MAS graduate program.
- Led a major revision of the MAS undergraduate curriculum, composed of five new program clusters.
- Established an assistant director position for the MAS program (fall 2007).
- Conceived of and directed the revision of the MAS capstone process (spring 2008), transforming it from a week-long activity to a four-hour one-evening event, with a considerable effect on recruitment.
- Leveraged MARLA resources for faculty to develop an educational partnership with GenCon, the largest gaming conference in the US (allowing students and faculty to interact with key members of the gaming industry and participate in educational workshops).
- Led the creation of the new MAS graduate program curriculum, which included new specifications for the MAS MS thesis and project guidelines.
- Established quarterly meetings with the MAS advisory board (20+ members) to address curriculum, program support, and funding (fall 2007).
- Elected a MAS advisory board chairperson to lead the direction of the board.
- Received grant funding to support faculty-student research lab creation
 - Received an IUPUI Educational and Learning Environment Grant, used as seed money to build the **Media Arts Research and Learning Arcade (MARLA)**, with the goal to increase and improve undergraduate media arts gaming education and applied research. The first of its kind on the IUPUI campus, MARLA provided an environment where undergraduate students from Informatics and other IUPUI programs could collaborate on serious and casual game design.
 - Received a MacArthur Foundation Gaming Educational Grant, of which I was Co-PI. The grant launched the first major faculty-student project in MARLA. I also initiated MARLA 2 in 2012, which provided students and faculty from Media Arts, Human Computer Interaction, and Health Informatics, a lab space for empirical mobile gaming/simulation studies.
