

**COVID-19 considerations**

We understand the hardships that the COVID-19 situation is placing on students. Please refer to the statements below, which apply to new (fall 2020) BS in coordinated program (BS/CP) students, and current and prospective nutrition science program students.

Online courses and labs will be accepted for prerequisites temporarily due to COVID-19 restrictions. Please contact [Kirsten Straughan](#) for any questions or concerns regarding the program requirements.

Students that have been accepted into the BS/CP for fall 2020 will need to maintain a grade for the prerequisite courses per the policy requiring a C or higher in these classes.

Students interested in applying to the nutrition science program are encouraged to maintain a letter grade for their prerequisite courses.

Students currently enrolled in the nutrition science program are encouraged to maintain a letter grade in their prerequisite and DPD-required nutrition courses.
